About:

C Waterford consistently produces offspring that carry his own best attributes – laid back shoulder; correct, compact back; tight legs and a great attitude! He also produces babies with chrome.

He therefore is an excellent choice for adding bone, increasing reach of shoulder, and shortening the back of the mare.

Please contact Cornell University Equine Park for more information.

Breeding methods:

Artificial Insemination
Transported Cooled Semen
Frozen Semen
Embryo Transfer

Breeding goals:

Dressage
Jumping
Hunter
